## **Project Notes**

### **SFO**

<http://www.flysfo.com/>

The goal of the rebuilt site was to achieve a modern, responsive platform with a clean design and meet high standards of accessibility.

Drupal was chosen for its huge suite of existing modules, functionality and scalability.

Highlights:

- Import Flight Status feed with the ability to filter by different criteria
- Thousand pages of static content to scrub and migrate
- Listing of shops, restaurants and other amenities within SFO
- Ability to filter shops, restaurants and other amenities based on Terminals
- Museum and museum collection archive, with location of art pieces within the SFO
- Implementing WAG 2.0 AA compliance

### **ARNOLD**

<http://arnoldbread.com/>

Highlights:

- This was an inherited Drupal site where the task was to enhance some of the existing features and rollout some new ones in phases.
- Highlights:
- Tag products and recipes for better filtering and search
- Create content types for landing pages and homepage for easier editing
- Added "Where to Buy" to work with Bimbo's already existing product locator API
- Added internationalization module for Spanish version of the site

**Telefonica**

<http://indexdigitallife.telefonica.com/>

Highlights:

Wordpress

- Multi language using one CMS/database
- Theme with custom post types for different types of media. Videos, Galleries for images, PDF.
